

Create a web page with the following design form.

Value box.

MARSHALL UNIVERSITY

Investment 2000

annual interest

number of years

future value

please set up a new number

Calculate Clear

Delete

Modify

ADD

Using ASP.NET web forms and design.

The Calculate button will use the following formula

Future value:

$$\left(\left(\left(\text{Investment} * \text{annual Interest} \right) / 100 \right) * \text{Number of Years} \right) + \text{Investment}.$$

The Add, Modify and Delete button will affect the value in the Investment drop down box. These buttons use the value the user put in the Value box.

Please ADD or Modify value from the value box in the Investment drop down box.

You need to be able to Delete a value you selected from the investment drop down box

You can use any picture not only Marshall University.
