

Please create these web page's structure, each one of the boxes refer to a web page form. When you click on the menu link it should take you to the related web page Form. The form should display a message stipulating the name of the page. Create a button on each web page form to exit the page. The exit button will return to the parent page.

On the Root web page form, add a sitemap menu and a tree view showing the structure.

On the web page you needs to add any control that will indicate the page. (label or textbox). Try to use style to indicate background color for the page.
